DERMAPLANE FACIAL R720

Skin-smoothing, gentle exfoliation treatment using a sterile blade. Dull skin cells and vellus facial hair ("peach-fuzz") are removed without pain or downtime, leaving your skin silky smooth.

DermaPlane can be added into most facials on our list (extra R250)

MICRO-NEEDLING (Dermapen) R1350

Intensive anti-aging treatment using tiny needles to push active serums deep into your epidermis, while activating collagen and elastin. Treats fine lines and wrinkles, hyper-pigmentation, scarring, stretch-marks, enlarged pores and overall skin texture. Numbing cream can be applied.

Downtime 2-3 days.

SPICULES R1250

The latest alternative to micro-needling. Skin treatment using fresh water Spongilla spicules (biodegradable micro-needles) pressed into your skin to increase collagen and elastin, improve skin texture and tone as well as increase absorption of topical ingredients applied. No numbing required.

A prickly sensation is experienced for up to 3 days.

Results within 10 days!
